

HPE P50219-B21 unidad de estado sólido 3,84 TB U.3 NVMe

Ref.: SE3055245 P/N: P50219-B21

Detalle del producto

Do you need to accelerate the performance of your read intensive applications? HPE NVMe High Performance Read Intensive (RI) Solid State Drives (SSDs) are best suited for applications requiring a strong blend of high read IOPS, low latency, and high endurance at a strong price point. NVMe SSDs communicate directly with applications via the PCIe bus to boost I/O bandwidth and reduce latency. HPE NVMe High Performance RI SSDs provide high-performance data transfers from storage at rates faster than SAS or SATA SSDs. They are designed to utilize the high bandwidth of PCIe Gen4 in select servers for read-heavy workloads such as read caching, web servers, and boot/swap. Argumento de ayuda para novedades: Offering 1.92 TB, 3.84 TB, 7.68 TB, and 15.36 TB HPE NVMe High Performance Read Intensive SFF SSDs.
