Apple Macbook Air 13,6"/ M5 10-Core CPU/ 16GB/
1TB SSD/ 10-Core GPU/ Plata

Llévalo a tu aire.

El MacBook Air es increíblemente ligero. Con solo 1,23 kg de peso y poco más de un centímetro de grosor, te lo querrás llevar al fin del mundo. Además, está fabricado con más de un 50 % de materiales reciclados, y su resistente carcasa de aluminio reciclado aguanta lo que le echas.

Dos tamaños perfectos para llevar.Â

El MacBook Air de 13 pulgadas es el no va más de la portabilidad, mientras que el de 15 te da más espacio de pantalla para que la multitarea campe a sus anchas.

La IA echa a volar.Â

Gracias a la potente combinación de la GPU, el Neural Engine y la memoria unificada del chip M5, el MacBook Air ofrece un rendimiento en IA estratosférico. Con un Neural Accelerator integrado en cada núcleo de la GPU, las tareas de IA se ejecutan de manera aún más eficiente. Desde el escalado de imágenes por IA a la integración de los últimos modelos extensos de lenguaje. Tu productividad y creatividad no tienen techo. La multitarea pone la directa.Â

Con el chip M5 todo va más rápido y fluido, ya sea trabajar con un montón de apps y pestañas abiertas, editar vídeo 4K o echar partidas épicas a juegos como InZOI. Además, su diseño sin ventilador lo hace ultrasilencioso. Autonomía de largo alcance.Â

El MacBook Air funciona hasta 18 horas con batería y recarga hasta un 50 % en apenas 30 minutos.16 Así tú puedes dedicarte a trabajar, estudiar o ver pelis sin andar buscando enchufes por ahí.

Diseñado para la IA.Â Empezando por el chip.

El MacBook Air con chip M5 está pensado para que todo el mundo, desde estudiantes hasta emprendedoras o profesionales creativos, pueda sacar el máximo partido a la IA, sin renunciar a la privacidad. No importa si usas las potentes prestaciones de Apple Intelligence en apps y macOS, si ejecutas modelos de lenguaje en tu Mac o programas con ayuda de la IA. Vas a ver cómo la productividad se dispara sin tener que preocuparte por la seguridad. En el Mac tienen su casa.

El Mac está optimizado para apps de inteligencia artificial como ChatGPT, LM Studio, Msty Studio, Topaz Video y Topaz Photo. Aprende de forma más eficiente, da vida a nuevas ideas y haz todo lo que se te ocurra.

Herramientas de IA en apps.Â

El Mac hace magia. Con las herramientas inteligentes, tu productividad y creatividad van a despegar, ya edites imágenes en Photoshop, renderices modelos 3D en Shapr3D o montes vídeos en Final Cut Pro. Trabaja menos. Rinde más.

Apple Intelligence es un sistema de inteligencia personal que te ayuda a redactar, expresarte y hacer tus tareas diarias sin esfuerzo. Cuenta con revolucionarias prestaciones de privacidad para que nadie más pueda acceder a tus datos. Ni siquiera Apple. Un gran poder conllevaÂ una gran privacidad.

Apple Intelligence se ha diseñado para proteger tu privacidad en todo momento y está completamente integrado en el Mac mediante procesos que se ejecutan dentro del dispositivo. En otras palabras, conoce tu información personal, pero jamás la recopila.

La innovadora prestación Computación Privada en la Nube permite a Apple Intelligence valerse de modelos de mayor tamaño basados en servidores, y que funcionan con chips de Apple, para procesar peticiones más complejas con total privacidad. Más formas de hacer más.

macOS está pensado para adaptarse a tu forma de trabajar, crear y comunicarte, con apps avanzadas que puedes usar a la vez sin problema. Tus ideas ganan velocidad.

Spotlight te lleva rápido.Â

Haz mil cosas sobre la marcha sin levantar los dedos del teclado, desde encontrar archivos y apps hasta enviar mensajes. Todo desde Spotlight.

Liquid Glass.Â

Y llegó la claridad. El nuevo diseño con Liquid Glass facilita la navegación por menús y controles y te ofrece más formas de personalizarlos. Cambia los iconos de claro a oscuro o elige un elegante aspecto translúcido.

Lo que quieres, donde lo quieres.Â

Pon en el Centro de Control los controles que más usas, como las ventanas en mosaico, las capturas de pantalla y el acceso a tus apps favoritas. Gracias al diseño transparente, la pantalla se ve limpia y despejada.

Traducción en Tiempo Real.Â

Comunícate en otros idiomas y traduce textos al instante en Mensajes, subtítulos en directo en FaceTime y llamadas en voz alta en la app Teléfono. Tu personalidad no tiene fronteras.

Juntos todo es mejor.

El Mac y el iPhone son increíbles por separado, pero juntos se vuelven imparables. Con las prestaciones de Continuidad puedes cambiar de un dispositivo a otro para compartir archivos y fotos, y hasta trabajar en la misma tarea. Un regalo para la vista.

La pantalla Liquid Retina del MacBook Air reproduce mil millones de colores y ofrece una resolución impresionante. Las fotos y las pelis muestran un contraste y un detalle nunca vistos, y el texto se ve supernítido. Muy bien conectado.

El puerto MagSafe tiene unos imanes que acoplan el cable de carga con solo acercarlo y lo sueltan al instante si alguien se tropieza. Los dos puertos Thunderbolt 4 te permiten conectar y cargar accesorios de alta velocidad. La toma de 3,5 mm admite auriculares de alta impedancia. Y el chip N1 de Apple mejora el rendimiento y la fiabilidad gracias a las conexiones inalámbricas Wi-Fi 7 y Bluetooth 6.

Tranquilidad al alcanceÂ de tu dedo.

Touch ID en el Magic Keyboard es la forma más fácil, rápida y segura de desbloquear el Mac, iniciar sesión en cuentas y autorizar pagos online. Además, el cifrado avanzado, la potente protección frente a virus y las actualizaciones de seguridad automáticas mantienen tus datos a buen recaudo. Especificaciones

Procesador

Chip: Apple M5

CPU: 10 núcleos (4 de alto rendimiento y 6 de eficiencia)

GPU: 10 núcleos

Neural Engine: 16 núcleos

Trazado de rayos: Aceleración por hardware

Ancho de banda de memoria: 153 GB/s

Memoria

Memoria unificada: 16 GB

Almacenamiento

SSD: 1 TB

Pantalla

Tipo: Liquid Retina con tecnología IPS

Tamaño: 13,6 pulgadas

Resolución: 2560 × 1664 píxeles

Densidad: 224 ppp

Brillo: 500 nits

Color: Compatible con 1.000 millones de colores

Gama cromática: P3

Tecnología: True Tone

Motor multimedia

Aceleración por hardware para H.264, HEVC, ProRes y ProRes RAW

Motor de decodificación de vídeo

Motor de codificación de vídeo

Motor de codificación y decodificación ProRes

Decodificación AV1

Batería

Hasta 18 horas de reproducción de vídeo en streaming

Hasta 15 horas de navegación web inalámbrica

Batería integrada de polímero de litio de 53,8 Wh

Carga mediante MagSafe 3 o USB-C

Potencia mínima de carga: 30 W

Carga rápida con cargador USB PD de 70 W o superior

Puertos y conexiones

1 puerto de carga MagSafe 3

2 puertos Thunderbolt 4 / USB-C (hasta 40 Gb/s)

Compatible con DisplayPort

Toma de auriculares de 3,5 mm

Compatibilidad con monitores

Hasta 2 monitores externos 6K a 60 Hz o 4K a 144 Hz

1 monitor externo hasta 8K a 60 Hz o 4K a 240 Hz

Compatible con DisplayPort 1.4 (HBR3) y DSC

Conectividad

Wi-Fi 7 (802.11be)

Bluetooth 6

Tecnología de red Thread

Cámara

Cámara 12 MP Center Stage

Grabación de vídeo 1080p HD

Procesador de señal de imagen avanzado

Audio

Sistema de cuatro altavoces

Audio espacial compatible con Dolby Atmos

Conjunto de tres micrófonos con tecnología beamforming

Modos de micrófono: Aislamiento de voz y sonido de fondo

Conector de auriculares de 3,5 mm con soporte para alta impedancia

Teclado y trackpad

Magic Keyboard retroiluminado

78 teclas (ANSI) o 79 teclas (ISO)

Touch ID integrado

Sensor de luz ambiental

Trackpad Force Touch con gestos Multi-Touch

Dimensiones y peso

Alto: 1,13 cm

Ancho: 30,41 cm

Fondo: 21,5 cm

Peso: 1,23 kg

Sistema operativo

macOS
